

PLATFORM NAMING PROPOSAL

Suggested Swahili names for the public-facing brand

Summary — "Changia" is the working name currently built into the system. Dr. Msuya has requested a Swahili name — one or two words — for how the platform presents itself to donors and organizations. The directions he raised, *Jamii Yangu* and *Msalamia Mwema*, point toward something warm and community-centred rather than corporate or technical. The options below follow that same direction, grouped by tone, for review and discussion.

CANDIDATE NAMES

COMMUNITY & BELONGING

Jamii Yangu	"My Community"	Dr. Msuya's own example. Frames the platform as belonging to the people using it, not to the organization running it — fits the NGO, community-support identity directly.
Jumuiya Yetu	"Our Fellowship"	Commonly used for churches and community groups; extends naturally to church, chama and association use without sounding NGO-specific.

SUPPORT & CARE

Msaada Mwema	"Good Help"	Closest match to Dr. Msuya's second example. Emphasises help freely given — reads well for funerals and personal-need contributions, not only fundraising targets.
Mkono Mwema	"A Kind Hand"	Evokes a helping hand offered to someone in need; warm and easy to say, works equally for weddings, funerals and community campaigns.

CALL TO CONTRIBUTE

Tuchangie	"Let's All Contribute"	Inclusive "we" form of Changia itself — keeps the existing brand recognisable while sounding more communal and less transactional.
Ustawi	"Wellbeing"	Single word, dignified and broader than money — useful if the platform should read as general welfare and mutual support, not only fundraising.

WHY THIS MATTERS BEYOND FUNDRAISING

Harambee	NGO and community fundraising campaigns — the current focus, with a public target and progress page.
Harusi	Weddings and personal occasions — often private, sometimes with in-kind gifts alongside money.
Msiba	Funerals — urgent, usually no fixed target, needs to go live quickly with a clear running total.
Kanisa / Chama	Churches and community groups — ongoing contributions (tithe, dues) rather than a one-off campaign.
Biashara	Businesses and associations tracking incoming contributions on a running ledger, not a campaign.

A warm, community-style name reads naturally across all of these — a name built only around "fundraising" or "donation" would fit the first row well but sound out of place for a wedding or a funeral.

RECOMMENDATION

"Changia" is already built into the system's code, database and domain, so replacing it outright carries real rework cost. The lower-cost path is to keep **Changia** as the underlying product name and adopt one of the options above — **Jamii Yangu** or **Msaada Mwema** are the closest fit to Dr. Msuya's own direction — as the public-facing brand or tagline (for example, "Changia — Jamii Yangu"). If a full rename is preferred instead, now is the right time to decide, since the platform has not yet been deployed to production hosting.
