

Project Update — Where We Are and What's Next

A quick, plain-language look at progress, upcoming work, and the timeline to launch.

Stage 1 is complete — the foundation of your platform is built and working.

Everything below was finished and tested as agreed. We're now moving straight into Stage 2.

Done so far

STAGE 1

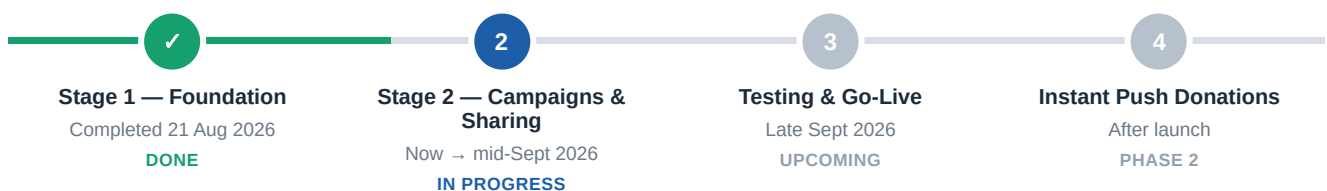

- ✓ Secure sign-in with different access levels for admins and managers
- ✓ Your organization dashboard, to manage everything in one place
- ✓ A donor contact system — add, organize and tag your supporters
- ✓ All core website pages: Home, About, Contact, FAQ, Privacy, Terms
- ✓ Clean, professional design in your brand colours (blue & green)

Coming next

STAGE 2

- Ability to create and manage fundraising campaigns
- Shareable campaign links, QR codes & WhatsApp/SMS/email sending
- A public page where donors can view a campaign and pay in
- Automatic receipts and live progress tracking for each campaign

Full project timeline

On the third feature: as agreed, we're building the platform in two stages before going live — Stage 1 (done) and Stage 2 (campaigns & sharing). The third feature, **instant push payment requests**, will be added **after the system launches**, once we can see how real donors and managers are actually using Changia. This keeps the launch on time and means that feature gets built around real usage, not guesswork.

Thank you for your continued trust as we build this together — we're on track and moving straight into Stage 2. Happy to walk through any of this in more detail on our next call.
